Personalized VISUM scripts tailored for your needs

services

Personalized Visum scripts tailored for your needs.

Intelligent infrastructure is proficient in providing advanced PTV Visum scripting solutions.

We have opened Visum, gone through all the procedures, studied the database, and applied almost each Visum function in our scripts.

We stripped Visum from its GUI and now we are able to provide you with professional Visum scripting services.

That's why apart from providing Visum users with off-the-shelf products we offer personalized services aiming to solve your problem. We will diagnose workflow, identify weaknesses and time consuming operations to propose solutions on how to create modeling environments tailored to your needs.

Just look at our off-the-shelf products catalogue and you will see our abilities. We are sure that our highly-skilled engineers can solve your problems.

Additionally, we invite you to contact and speak to us about your workflow we can give you hints on improvements based on our Visum scripting know-how.
